Summary

Passionate tech enthusiast and community leader with hands-on experience in web development (React, MERN, Vue, TypeScript), DevOps (Docker, Git), and IoT projects (Arduino, ESP32). Proficient in designing using Figma and advanced styling with Tailwind CSS. As CEO of INOVUS LABS IEDC, I lead innovation-driven initiatives, mentor peers, and execute events to foster a strong tech ecosystem. I blend creativity with code, driven by continuous learning and real-world impact.

Experience

- CEO, Inovus Labs IEDC** – Kristu Jyoti College, Changanacherry *Mar 2025 – Present*
- Lead strategic planning and execution of technical events, hackathons, workshops, talk-sessions etc.
 - Spearhead multidisciplinary projects across web development, IoT, and design.
 - Mentor and guide team members while handling procurement and inventory.
 - Foster a peer learning environment through initiatives like StepOne , Simply Series and Weekend Workbenches.
- Stock Manager, Inovus Labs IEDC** – Kristu Jyoti College, Changanacherry *Feb 2024 – Feb 2025*
- Managed inventory and procurement for community projects, ensuring timely availability of resources.
 - Coordinated team efforts to optimize the usage of tools and materials.
 - Expanded expertise in web development with React, MERN Stack, and Docker.
- Web Intern, Zidio Development** – Bangalore *Oct 2024 – Dec 2024*
- Developed practical knowledge of the MERN stack by integrating its components in web projects.
 - Collaborated with a team to refine project workflows and build real-world applications.
- Extended-Team Member, Inovus Labs IEDC** – Kristu Jyoti College, Changanacherry *Oct 2023 – Feb 2024*
- Contributed to projects integrating web development, IoT, and event management.
 - Organized workshops and hackathons, promoting technical skill development.
 - Advanced public speaking and leadership by addressing classes about events.
- Intern, Inovus Labs IEDC** – Kristu Jyoti College, Changanacherry *Sep 2023 – Dec 2023*
- Explored graphic design and mastered Figma for creating impactful visual content.
 - Gained experience hosting college events, enhancing teamwork and community engagement.
 - Actively contributed to community-building initiatives and skill-sharing sessions.

Education

Bachelor of Computer Application (BCA),
Kristu Jyoti College of Management and Technology, Changanssery
PLUS TWO,
St.Mary's Residential Public School, Thiruvalla

Projects

App.Mulearn.org

- Contributing to the development of MuLearn's official web platform.
- Worked on UI/UX improvements, performance enhancements, and feature development.
- Collaborated with a distributed developer community via GitHub.
- **Tech Stack:** TypeScript, Tailwind CSS, React, GitHub, Git.

Certificate.inovuslabs.org – Certificate Verification Portal

- Developed a decentralized certificate verification platform for Inovus Labs IEDC.
- Certificates are stored and verified via smart contracts deployed on the Polygon Mumbai Testnet.
- Frontend built using Next.js with Tailwind CSS and Radix UI for accessible and responsive design.
- Backend uses Node.js and MongoDB, with Web3.js handling blockchain interactions.
- **Stack:** Next.js, Tailwind CSS, Radix UI, Node.js, MongoDB, Web3.js, Polygon Mumbai

Purple-Movement – An Initiative-Based Website

- Built the website for Mulearn's initiative.
- Developed with TypeScript, Vite, and Tailwind CSS; Firebase used for backend storage.
- **Tools Used:** TypeScript, Vite, Tailwind CSS, Firebase

Inovus Labs.org – Community-Based Website

- Maintained the frontend for Inovus Labs IEDC's community website, focusing on events, projects, and resources for innovation and entrepreneurship.
- Continuously optimized the platform's performance, user experience, and updated content.
- **Tools Used:** Vue.js

Skill-Nedu – E-learning Platform

- Led the development of Skill-Nedu, a platform for upgrading skills through online learning.
- Designed and implemented core features to ensure seamless user experience.
- **Tools Used:** HTML5, CSS3, JavaScript

Bethel AG Church Website – Church Website

- Designed and developed a responsive website for Bethel AG Church Kuttapuzha to showcase ministries, events, and service information.
- Integrated interactive components like maps, media galleries, and donation links.
- **Tools Used:** HTML5, Tailwind CSS, JavaScript

Json Generator – Open-Source Tool

- Developed and maintained the frontend for **Json Generator**, an open-source project created as part of Inovus Labs' participation in **Hacktoberfest 2024**.
- Focused on enhancing usability and user experience for seamless JSON generation.
- **Tools Used:** HTML5, Tailwind CSS, JavaScript, Express.js, Node.js

Pattupeti – IoT-Driven Music Sharing System

- Integrated FM transmitter with web app to enable music queuing via a physical interface.
- **Tools Used:** ESP32, Node.js, Firebase, Tailwind CSS, USB Sound Card

Smart Irrigation System – Real-time ESP32 Project

- Automated irrigation using moisture sensors and NTP-synced scheduling via Firestore.
- Manual override through Vue UI toggle linked with Firebase backend.
- **Tools Used:** ESP32, Firestore, Vue.js

Additional Experience

Mentorship and Leadership

- Mentored 30+ students in a web design bootcamp (HTML, CSS, JS, Tailwind, Git, Github).
- Led teams in StepOne's IoT workshops
- Co-led event planning and documentation and hosted for Zypher 3.0 Science Exhibition , Biznova etc

Skills

Languages & Frameworks:

HTML5, CSS3, JavaScript, TypeScript, Node.js, React, Next.js, Vue.js, C++ , C, SQL, NoSQL, PHP, Markdown

Tools & Platforms:

Docker, Git, GitHub, Firebase, MongoDB, Figma, Tailwind CSS, VS Code, Arduino IDE

Hardware & IoT:

Arduino, ESP32, Pi, Sensor Integration

Soft Skills:

Leadership, Public Speaking, Peer Mentoring, Multilingual Communication, Quick Learning
